

**1. Accounting Policies****(a) General Principles**

The Statement of Accounts summarises the Authority's transactions for the financial year and its position at the 31<sup>st</sup> March year-end. The Authority is required to prepare an annual Statement of Accounts by the Accounts and Audit (England) Regulations 2015, those regulations which require the accounts to be prepared in accordance with proper accounting practices. These practices primarily comprise the *Code of Practice on Local Authority Accounting in the United Kingdom* and the *Service Reporting Code of Practice for Local Authorities (SeRCOP)*, supported by International Financial Reporting Standards (IFRS).

The accounting convention adopted in the Statement of Accounts is principally historical cost, modified by the revaluation of certain categories of non-current assets and financial instruments.

The summary of significant accounting policies includes the following items where they have a significant effect on the amounts recognised in the financial statements:

**(b) Accruals of Income and Expenditure**

Activity is accounted for in the year it takes place, not when physical cash payments are made or received. In particular:

- Revenue from the sale of goods is recognised when the Authority transfers the significant risks and rewards of ownership to the purchaser and it is probable that economic benefits or service potential associated with the transaction will flow to the Authority.
- Revenue from the provision of services is recognised when the Authority can measure reliably the percentage of completion of the transaction and it is probable that economic benefits or service potential associated with the transaction will flow to the Authority.
- Supplies are recorded as expenditure when they are consumed - where there is a gap between the date supplies are received and their consumption they are carried as inventories [stock] on the Balance Sheet, where the value is material.
- Expenses in relation to services received (including services provided by employees) are recorded as expenditure when the services are received rather than when payments are made.
- Interest receivable on investments is accounted for respectively as income and expenditure on the basis of the effective interest rate for the relevant financial instrument ('what is due') rather than the cash flows fixed or determined by the contract.
- Where revenue and expenditure have been recognised but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet. For all debts outstanding at the balance sheet date the balance of debtors is written down and a charge made to revenue for the income that might not be collected (bad debts).

### **(c) Acquisition and Discontinued Operations**

Where operations are acquired, discontinued or transferred these will be fully disclosed in the notes to the accounts.

### **(d) Cash and cash Equivalents**

Cash and cash equivalents are represented by cash in hand and deposits with financial institutions repayable, without penalty, on notice of not more than 24 hours. This includes bank call-accounts, Money Market Funds (MMF) and any other 'overnight-type' investments.

### **(e) Exceptional Items**

When items of income and expense are material, their nature and amount is disclosed separately, either on the face of the Comprehensive Income and Expenditure Statement or in the notes to the accounts, depending on how significant the items are to an understanding of the Authority's financial performance.

### **(f) Prior Period Adjustments, Changes in Accounting Polices and Estimates and Errors**

Prior period adjustments may arise as a result of a change in accounting policies or to correct a material error. Changes in accounting estimates are accounted for prospectively, ie in the current and future years affected by the change and do not give rise to a prior period adjustment.

Changes in accounting policies are only made when required by proper accounting practices or the change provides more reliable or relevant information about the effect of transactions, other events and conditions on the authority's financial position or financial performance. Where a change is made, it is applied retrospectively (unless stated otherwise) by adjusting opening balances and comparative amounts for the prior period as if the new policy had always been applied.

Material errors discovered in prior period figures are corrected retrospectively by amending opening balances and comparative amounts for the prior period. A full disclosure of the reasons for the amendments will accompany any changes in figures.

### **(g) Charges to Revenue for Non-Current Assets**

Services, support services and trading accounts are debited with the following amounts to record the cost of holding fixed assets during the year:

- depreciation attributable to the assets used by the relevant service
- revaluation and impairment losses on assets used by the services where there are no accumulated gains in the Revaluation Reserve against which the losses can be written off
- amortisation of intangible fixed assets attributable to the service

The Authority is not required to raise council tax to fund depreciation, revaluation and impairment losses or amortisations. However, it is required to make an annual contribution from revenue towards the reduction in its overall borrowing requirement equal to an amount calculated on a prudent basis determined by the Authority in accordance with statutory guidance. Depreciation, revaluation and impairment losses and amortisations are therefore replaced by the contribution in the General Fund Balance - Minimum Revenue Provision (MRP), by way of an adjusting transaction with the Capital Adjustment Account in the Movement in Reserves Statement for the difference between the two.

## **(h) Employee Benefits**

### Benefits payable during employment

Short-term employee benefits are those due to be settled within 12 months of the year-end. They include such benefits as wages and salaries, paid annual leave and paid sick leave, bonuses and non-monetary benefits (eg cars) for current employees and are recognised as an expense for services in the year in which employees render service to the Authority. An accrual is made for the cost of holiday entitlement (or any form of leave, eg time off in lieu) earned by employees but not taken before the year-end which employees can carry forward into the next financial year. The accrual is made at the wage and salary rates applicable in the following accounting year, being the period in which the employee takes the benefit. The accrual is charged to Surplus or Deficit on the Provision of Services, but then reversed out through the Movement in Reserves Statement so that holiday benefits are charged to revenue in the financial year in which the holiday absence occurs.

Overtime is only paid on limited occasions and requires prior Head of Service approval. Overtime is not contractual or regular, and therefore any holiday leave potentially accruing on overtime worked is not significant. The Council does not accrue for holiday pay due on overtime.

### Termination benefits

Termination benefits are amounts payable as a result of decisions by the Authority to terminate an officer's employment before the normal retirement date or an officer's decision to accept voluntary redundancy, and are charged on an accruals basis to the Comprehensive Income and Expenditure Statement when the Authority is demonstrably committed to the termination of the employment of an officer or group of officers or making an offer to encourage voluntary redundancy.

Where termination benefits involve the enhancement of pensions, statutory provisions require the General Fund Balance to be charged with the amount payable by the Authority to the pension fund or the employee in the year, not the amount calculated according to the relevant accounting standards.

## **(i) Post employment benefits**

Employees of the Authority are permitted to join of the Local Government Pension Scheme, administered by Gloucestershire County Council. This scheme provides defined benefits to members (retirement lump sums and pensions), earned as employees worked for the Council.

### The Local Government Pension Scheme

The Local Government Pension Scheme is accounted for as a defined benefits scheme:

- The liabilities of the Gloucestershire County Council pension fund attributable to the Council are included in the Balance Sheet on an actuarial basis using the projected unit method – i.e. an assessment of the future payments that will be made in relation to retirement benefits earned to date by employees, based on assumptions about mortality rates, employee turnover rates, etc, and projections of future earnings for current employees.
- Liabilities are discounted to their value at current prices, using a discount rate based on the gross redemption yield on the Iboxx Sterling Corporate Index, AA over 15 years, at the IAS19 valuation date. This is a high quality corporate bond of equivalent term and currency to the liability.
- The assets of the Gloucestershire County Council pension fund attributable to the Authority are included in the balance sheet at their fair value.
  - quoted securities – current bid price
  - unquoted securities – professional estimate

- unutilised securities – current bid price
- property – market value

In relation to retirement benefits, statutory provisions require the General Fund balance to be charged with the amount payable by the Authority to the pension fund or directly to pensioners in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, this means that there are transfers to and from the Pension Reserve to remove the notional debits and credits for retirement benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end. The negative balance that arises on the Pensions Reserve thereby measures the beneficial impact to the General Fund of being required to account for retirement benefits on the basis of cash flows rather than as benefits are earned by employees.

### **Discretionary Benefits**

The Council also has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award to any member of staff are accrued in the year of the decision to make the award and accounted for using the same policies as are applied to the Local Government Pension Scheme.

### **(j) Events After the Balance Sheet Date**

Events after the Balance Sheet date are those events (both favourable and unfavourable) that occur between the end of the reporting period and the date when the Statement of accounts is authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the end of the reporting period – the Statement of accounts is adjusted to reflect such events
- those that are indicative of conditions that arose after the reporting period – the Statement of accounts is not adjusted to reflect such events, but where a category of events would have a material effect, disclosure is made in the notes of the nature of the events and their estimated financial effect.

Events taking place after the date of authorisation for issue are not reflected in the Statement of Accounts.

### **(k) Financial Instruments**

**Financial liabilities** are recognised on the Balance Sheet when the authority becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value and carried at their amortised cost. Annual charges to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest payable are based on the carrying amount of the liability, multiplied by the effective rate of interest for the instrument. The effective interest rate is the rate that exactly discounts estimated future cash payments over the life of the instrument to the amount at which it was originally recognised.

Any borrowing that the Authority may undertake would be presented in the Balance Sheet at the outstanding principal repayable (plus accrued interest); and interest charged to the Comprehensive Income and Expenditure Statement is the amount payable for the year according to the loan agreement.

Where premiums and discounts have been charged to the Comprehensive Income and Expenditure Statement, regulations allow the impact on the General Fund Balance to be spread over future years. The Council has a policy of spreading the gain or loss over the term that was remaining on the loan against which the premium was payable or discount

receivable when it was repaid, where material. The reconciliation of amounts charged to the Comprehensive Income and Expenditure Statement to the net charge required against the General Fund Balance is managed by a transfer to or from the Financial Instruments Adjustment Account in the Movement in Reserves Statement.

**Financial assets** are classified into two types:

- loans and receivables – assets that have fixed or determinable payments but are not quoted in an active market
- available-for-sale assets – assets that have a quoted market price and/or do not have fixed or determinable payments.

### **Loans and receivables**

Loans and receivables are recognised on the Balance Sheet when the Authority becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value. They are subsequently measured at their amortised cost. Annual credits to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest receivable are based on the carrying amount of the asset multiplied by the effective rate of interest for the instrument. For most of the loans that the Authority has made, this means that the amount presented in the Balance Sheet is the outstanding principal receivable (plus accrued interest) and interest credited to the Comprehensive Income and Expenditure Statement is the amount receivable for the year in the loan agreement.

Where assets are identified as impaired because of a likelihood arising from a past event that payments due under the contract will not be made, the asset is written down and a charge made to the relevant service (for receivables specific to that service) or the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. The impairment loss is measured as the difference between the carrying amount and the present value of the revised future cash flows discounted at the asset's original effective interest rate.

Where loans are repaid in advance of the settlement date the Council will recognise any interest paid in respect of the loan in the financial year in which settlement is received.

## **(l) Foreign Currency Translation**

The Council deals in sterling wherever possible.

Movements in foreign currency exchange rates will impact on the value of the investment. At the time the investment matures (or at the balance sheet date) investments are valued, based upon the current exchange rate. Any change in investment value will be debited or credited to the 'financing and investing income & expenditure' section of the Comprehensive Income & Expenditure Account as an exchange rate gain/loss.

The Authority currently has one financial asset denominated in Icelandic Krona.

## **(m) Government Grants and Contributions**

Whether paid on account, by instalments or in arrears, government grants and third party contributions and donations are recognised as due to the Authority when there is assurance that:

- the Authority will comply with the conditions attached to the payments, and
- the grants or contributions will be received.

Amounts recognised as due to the Authority are not credited to the Comprehensive Income and Expenditure Statement until conditions attached to the grant or contributions have been satisfied. Conditions are stipulations that specify that the future economic benefits or service potential embodied in the asset acquired using grant or contribution are required to be consumed by the recipient as specified, or future economic benefits or service potential must be returned to the transferor.

Monies advanced as grants and contributions for which conditions have not been satisfied are carried in the Balance Sheet as creditors. When conditions are satisfied, the grant or contribution is only then credited to Comprehensive Income and Expenditure Statement.

Where capital grants are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the General Balance in the Movement in Reserves Statement. Where the grant has yet to be used to finance capital expenditure, it is posted to the Capital Grants Unapplied reserve. Where it has been applied, it is posted to the Capital Adjustment Account. Amounts in the Capital Grants Unapplied reserve are transferred to the Capital Adjustment Account once they have been applied to fund capital expenditure.

Most Section 106 grant contributions which the Council holds have conditions which require the contribution to be returned if the contribution remains unspent after 5 years. Although it is highly probable that the conditions will be met, it is not guaranteed. Section 106 contributions are therefore held on the balance sheet as creditors. Similarly, where grants have been received for specific projects these are treated as grants with conditions [creditors] until the project has begun or the item of equipment to which the grant relates has been purchased.

## **(n) Intangible Assets**

Expenditure on non-monetary assets that do not have physical substance but are controlled by the Authority as a result of past events (e.g. software licences) is capitalised when it is expected that future economic benefits or service potential will flow from the intangible asset to the authority. Intangible assets are measured initially at cost.

The depreciable amount of an intangible asset is amortised over its useful life (usually 4 years) to the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

The Council carries no internally generated intangible assets on its balance sheet.

**(o) Interests in Companies and Other Entities**

The Authority is required to consider all its interests (including those in local authorities and similar bodies) and to prepare a full set of group financial statements where they have material interests in subsidiaries, associates or joint ventures.

**(p) Inventories and Long Term Contracts**

Inventories [stocks] are included in the Balance Sheet at cost.

Long term contracts are accounted for on the basis of charging the Surplus or Deficit on the Provision of Services with the value of works and services received under the contract during the financial year.

**(q) Investment Property**

Investment properties are those that are used solely to earn rentals and/or for capital appreciation. The definition is not met if the property is used in any way to facilitate the delivery of services or production of goods or if is classified as held for sale.

Investment properties are measured initially at cost and subsequently at fair value, based on the amount at which the asset could be exchanged between knowledgeable parties at arm's-length. Properties are not depreciated but are subject to a review at year end to determine whether market conditions require properties to be revalued. Any gains or losses on revaluation are posted to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. The same treatment is applied to gains and losses on disposal.

Rentals received in relation to investment properties are credited to the Financing and Investment Income and Expenditure line and result in a gain for the General Fund Balance. However, revaluation and disposal gains and losses are not permitted by statutory arrangements to have an impact on the General Fund Balance. The gains and losses are therefore reversed out of the General Fund Balance in the Movement in Reserves Statement and posted to the Capital Adjustment Account or (for any sale proceeds greater than £10,000) the Capital Receipts Reserve.

**(r) Leases**

Leases are classified as finance leases when the terms of the lease transfer substantially all the risks and rewards incidental to ownership of the property, plant or equipment from the lessor to the lessee. All other leases are classified as operating leases.

Where a lease covers both land and buildings, the land and building elements are considered separately for classification.

Arrangements that do not have the legal status of a lease but convey a right to use an asset in return for payment are accounted for under this policy where fulfilment of the arrangement is dependent on the use of specific assets.

## **The Authority as Lessee**

### Finance leases

Property, plant and equipment held under a finance lease is recognised on the Balance Sheet at the commencement of the lease at its fair value, measured at the lease's inception (or the present value of the minimum lease payments, if lower). The asset recognised is matched by a liability for the obligation to pay the lessor. Initial direct costs of the authority may be added to the carrying amount of the asset. Premiums paid on entry into a lease are applied to writing down the lease liability.

Lease payments are apportioned between:

- a charge for the acquisition of the interest in the asset – applied to write down the lease liability, and
- a finance charge (debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement).

Property, plant and equipment recognised under finance leases is accounted for using the policies applied generally to such assets, subject to depreciation being charged over the lease term if this is shorter than the asset's estimated useful life (where ownership of the asset does not transfer to the Authority at the end of the lease period).

The Authority is not required to raise council tax to cover depreciation or revaluation and impairment losses arising on leased assets. Instead, a prudent annual contribution is made from revenue funds towards the deemed capital investment in Accordance with statutory requirements. Depreciation and revaluation and impairment losses are therefore substituted by a revenue contribution in the General Fund Balance, by way of an adjusting transaction with the Capital Adjustment Account in the Movement in Reserves Statement for the difference between the two.

### Operating leases

Lease payments made under operating leases are charged to the Comprehensive Income and Expenditure Statement as an expense of the services benefiting from use of the leased asset.

## **The Authority as Lessor**

### Finance leases

Where the Authority grants a finance lease over a property or an item of plant or equipment, the relevant asset is written out of the Balance Sheet as a disposal.

Lease rentals receivable are apportioned between:

- a charge for the acquisition of the interest in the property – applied to write down the lease debtor (together with any premiums received), and
- finance income (credited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement).

Any gain credited to the Comprehensive Income and Expenditure Statement on disposal is not permitted by statute to increase the General Fund Balance and is required to be treated as a capital receipt. Where a premium has been received, this is posted out of the General Fund Balance to the Capital Receipts Reserve in the Movement on Reserves Statement. Where the amount due in relation to the lease asset is to be settled by the payment of rentals in future financial years, this is posted out of the General Fund Balance to the Deferred Capital Receipts Reserve. When the future rentals are received, the element for the capital receipt for the disposal of the asset is

used to write down the lease debtor. At this point, the deferred capital receipts are transferred to the Capital Receipts Reserve.

The written-off value of disposals is not a charge against council tax, as the cost of fixed assets is fully provided for under separate arrangements for capital financing. Amounts are therefore appropriated to the Capital Adjustment Account from the General Fund Balance in the Movement in Reserves Statement.

### Operating leases

Where the Authority grants an operating lease over a property or an item of plant or equipment, the asset is retained in the Balance Sheet. Rental income is credited to the 'Other Operating Expenditure' line in the Comprehensive Income and Expenditure Statement. Credits are made on a straight-line basis over the life of the lease even if this does not match the pattern of payments (eg there is a premium paid at the commencement of the lease). Initial direct costs incurred in negotiating and arranging the lease are added to the carrying amount of the relevant asset (if material) and charged as an expense over the lease term on the same basis as rental income.

### **(s) Overheads and Support Services**

The costs of overheads and support services are charged to those that benefit from the supply or service in accordance with the costing principles of the CIPFA Service Reporting Code of Practice (*SeRCOP*). The total absorption costing principle is used – the full cost of overheads and support services are shared between users in proportion to the benefits received, with the exception of:

- Corporate and Democratic Core – costs relating to the Council's status as a multi-functional, democratic organisation.
- Non Distributed Costs – the cost of discretionary benefits awarded to employees retiring early and impairment losses chargeable on Assets Held for Sale.

These two cost categories are defined in *SeRCOP* and accounted for as separate headings in the Comprehensive Income and Expenditure Statement, as part of Net Expenditure on Continuing Services.

Recharges are primarily made on the basis of time allocations or other means of activity. Examples of recharge methodologies include debtors and creditors (transaction numbers), payroll and personnel (employee numbers) and office overheads (floor areas), for example.

## **(t) Property, Plant and Equipment (updated)**

Assets that have physical substance and are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes and that are expected to be used during more than one financial year are classified as Property, Plant and Equipment.

### Recognition

Expenditure on the acquisition, creation or enhancement of Property, Plant and Equipment is capitalised on an accruals basis, provided that it is probable that the future economic benefits or service potential associated with the item will flow to the Authority and the cost of the item can be measured reliably. Expenditure that maintains but does not add to an asset's potential to deliver future economic benefits or service potential (e.g. repairs and maintenance) is charged as an expense when it is incurred.

The Council's capitalisation de minimis is £10,000, except for where the sum of a group of assets is significant, such as waste collection bins and boxes or ICT equipment.

### Measurement

Assets are initially measured at cost, comprising:

- the purchase price
- any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

The 'cost' of an asset acquired other than by purchase is deemed to be its fair value, unless the acquisition was for no monetary value. Where the purchase of an asset is acquired via an exchange, the cost of the acquisition is the carrying amount of the asset given up by the Authority.

Assets are carried in the Balance sheet using the following measurement bases:

- infrastructure, community assets and assets under construction – depreciated historical cost
- dwellings – fair value, determined using the basis of existing use value for social housing (EUV-SH)
- Surplus assets – 'highest and best use'
- all other classes of asset – fair value, determined as the amount that would be paid for the asset in its existing use (existing use value – EUV).

Where there is no market-based evidence of fair value because of the specialist nature of an asset, depreciated replacement cost (DRC) is used as an estimate of fair value.

Items of equipment, which have short useful lives or low values (or both) are held on the balance sheet at depreciated historical cost, as an approximation of fair value.

Assets included in the balance sheet at fair value are revalued to ensure that their carrying amount is not materially different from their fair value at year-end. All land and buildings are revalued at least every 5-years as part of a rolling programme. Increases in valuations are matched by credits to the Revaluation Reserve to recognise unrealised gains. Exceptionally, gains might be credited to the Comprehensive Income and Expenditure Statement where they arise from the reversal of a loss previously charged to a service.

Where items or property plant and equipment are revalued, and the valuers identifies an asset which has component parts that have significantly different useful lives, where one or more parts represent a significant proportion of the overall asset, then the asset may be componentised. With componentisation, one or more constituent parts may be identified, and the component parts separately valued for the accounts and depreciated over different useful lives to the main asset. Useful economic lives (and therefore depreciation calculations) will be based upon the asset lives recommended by the Council's valuers.

Upon revaluation, where decreases in value are identified, they are accounted for by:

- where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gain)
- where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line in the Comprehensive Income and Expenditure Statement.

The Revaluation Reserve contains revaluation gains recognised since 1 April 2007, the date of its formal implementation. Gains arising before that date have been consolidated into the Capital Adjustment Account.

### Impairment

Assets are assessed at each year-end as to whether there is any indication that an asset may be impaired. Where indications exist and any possible differences are estimated to be material, the recoverable amount of the asset is estimated and, where this is less than the carrying amount of the asset, an impairment loss is recognised for the shortfall.

Where impairment losses are identified, they are accounted for by:

- where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains)
- where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.
- Where an impairment loss is reversed subsequently, the reversal is credited to the relevant service line(s) in the Comprehensive Income and Expenditure Statement up to the amount of the original loss, adjusted for depreciation that would have been charged if the loss had not been recognised.

### Depreciation

Depreciation is provided for on all Property, Plant and Equipment assets. Assets are written-down over the useful life of the asset. An exception is made for assets without a determinable finite useful life (ie freehold land and certain Community Assets) and assets that are under construction (and not yet available for use).

Depreciation is calculated on the following bases:

- Operational buildings and surplus property – depreciated on a straight-line basis, over a 40 year period (unless an asset life is deemed to be materially different to this by the Council's Valuer).
- Land is not depreciated
- Vehicles, plant, furniture and equipment – depreciated on a straight-line basis, over a 4-year period
- Investment property is not depreciated

Where an item of Property, Plant and Equipment asset has major components whose cost is significant in relation to the total cost of the item, the components are depreciated separately.

Revaluation gains are also depreciated, with an amount equal to the difference between current value depreciation charged on assets and the depreciation that would have been chargeable based on their historical cost being transferred each year from the Revaluation Reserve to the Capital Adjustment Account.

### **Disposals and non-current assets held for sale**

When it becomes probable that the carrying amount of an asset will be recovered principally through a sale transaction rather than through its continuing use, it is reclassified as an Asset Held for Sale. The asset is revalued immediately before reclassification and then carried at the lower of this amount and fair value less costs to sell.

If assets no longer meet the criteria to be classified as Assets Held for Sale, it will be reclassified back to non-current assets and valued at the lower of their carrying amount before being classified as held for sale, adjusted for depreciation, amortisation or revaluations that would have been recognised had they not been classified as Held for Sale, and their recoverable amount at the date of the decision not to sell.

Assets that are to be abandoned or scrapped are not reclassified as Assets Held for Sale.

When an asset is disposed of or decommissioned, the carrying amount of the asset in the Balance Sheet is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals (if any) are credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal (ie netted off against the carrying value of the asset at the time of disposal). Any accumulated revaluation gains held for the asset in the Revaluation Reserve are transferred to the Capital Adjustment Account.

Amounts received for disposal in excess of £10,000 are categorised as capital receipts.

#### **(u) Provisions, Contingent Liabilities and Contingent Assets**

##### Provisions

Provisions are made where an event has taken place that gives the Authority a legal or constructive obligation that probably requires settlement by a transfer of economic benefits or service potential, and a reliable estimate can be made of the amount of the obligation.

Provisions are charged as an expense to the appropriate service line in the Comprehensive Income and Expenditure Statement in the year that the Authority becomes aware of the obligation, and are measured at the best estimate at the balance sheet date of the expenditure required to settle the obligation, taking into account relevant risks and certainties.

When payments are eventually made, they are charged to the provision carried in the Balance Sheet. Estimated settlements are reviewed at the end of each financial year – where it becomes less than probable that a transfer of economic benefits will now be required (or a lower settlement than anticipated is made), the provision is reversed and credited back to the relevant service.

Where some or all of the payment required to settle a provision is expected to be recovered (e.g. from an insurance claim), this is only recognised as income for the relevant service if it is virtually certain that reimbursement will be received if the Authority settles the obligation.

### Contingent Liabilities

A contingent liability arises where an event has taken place that gives the Authority a possible obligation whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the authority. Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that an outflow of resources will be required or the amount of the obligation cannot be measured reliably.

Any material contingent liabilities are disclosed in the notes to the accounts.

### Contingent Assets

A contingent asset arises where an event has taken place that gives the authority a possible asset whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Authority.

Contingent assets are not recognised in the Balance Sheet but disclosed in the notes to the accounts where it is probable that there will be an inflow of economic benefits or service potential.

### **(v) Reserves**

The Authority sets aside specific amounts as reserves for future policy purposes or to cover contingencies. Reserves are created by appropriating amounts out of the General Fund Balance, via the Movement in Reserves Statement. When expenditure to be financed from a reserve is incurred, it is charged to the appropriate service in that year to score against the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement. The reserve is then charged back into the General Fund Balance in the Movement in Reserves Statement so that there is no net charge against council tax for the expenditure.

Certain reserves are kept to manage the accounting processes for non-current assets, financial instruments, and retirement & employee benefits and do not represent usable resources for the Authority – these reserves are explained in the relevant policies.

### **(w) Revenue expenditure funded from capital under statute**

Expenditure incurred during the year that may be capitalised under statutory provisions but that does not result in the creation of a non-current asset is charged as expenditure to the relevant service in the Comprehensive Income and Expenditure Statement in the year. Where the Council has determined to meet the cost of this expenditure from existing capital resources, or by borrowing, a transfer in the Movement in Reserves Statement from the General Fund Balance to the Capital Adjustment Account to reverse out the amounts charged so there is no impact on the level of council tax.

### **(x) Heritage Assets (updated)**

Heritage assets are those assets that are held and maintained principally for their contribution to knowledge and culture.

The Council owns the Corinium Museum in Cirencester. The museum contains a large number of artefacts, with a particular specialism in the Roman heritage of Cirencester and the surrounding area. Many of the items in the Museum collection meet the classification of Heritage Assets adopted by the Code [FRS102].

Where assets have been purchased or recently obtained, information on their cost or value will be available. The Code allows that where this information is not available, or cannot be obtained at a value which is commensurate with the benefits to users of the financial statements, that the assets need not be recognised in the Balance Sheet. The

majority of the Council's museum collection has not been included on the Council's Balance Sheet.

When purchased or where a value is available, heritage assets are recognised on the balance sheet at historic cost. Assets within the museum collection are deemed to have indeterminate lives; hence the authority does not consider it appropriate to charge depreciation on those heritage assets on the Council's balance sheet. Due to the nature of the type of assets held, the Council's heritage assets are not subject to revaluation and will only be impaired if there is clear reason to suspect the assets have become impaired.

**(y) Value Added Tax**

VAT payable is included as an expense only to the extent that it is not recoverable from Her Majesty's Revenue and Customs (HMRC). VAT receivable is excluded from income.
