Key Risks	<p>There are risks of financial institutions failing given the current economic conditions. However, the risks are mitigated through application of the Council's Treasury Management Strategy. The strategy sets out the minimum credit criteria that are required before the Council will invest with a counterparty, but it should be noted that these are not the sole criteria applied. For example, credit default swaps and information from the financial press will also be taken into account.</p> <p>There are risks of interest rates remaining low over the medium term which impact on the Council's ability to generate investment income. These risks are routinely considered in the Council's Treasury Management Strategy, the Medium Term Financial Strategy and the associated Budget Strategy.</p>
Equalities Impact Assessment	Not Required
