

ENVIRONMENTAL	Scores	Action	Justification
GHGs	0	No action required.	There is a potential for future removal of Asbestos to produce some GHGs as disposal involves a specialist hazardous waste landfill, best practice to keep ACMs in situ and monitor the condition.
Air quality	0	No action required.	Should disposal be indicated, ACMs will be removed by specialist HSE approved contractors, minimising the risk of asbestos fibres presenting a hazard to either Partnership staff or the general public.
Sustainable Transport	0	No action required.	0
Land use change	0	No action required.	0
Biodiversity	0	No action required.	0
Soil and waterway health	0	No action required.	Best practice suggests that leaving ACMs in situ with clear management and monitoring plan in place, this in turn removes the need for remedial works to take place and the subsequent potential impact on soil and waterway health that could be associated with this.
Climate Change	0	No action required.	0
Energy Use	0	No action required.	Best practice suggests that leaving ACMs in situ with clear management and monitoring plan in place, this in turn removes the need for remedial works to take place and the subsequent energy use associated with this.
Sustainable Materials	0	No action required.	Although, the health and safety team would advocate replacing ACMs where possible with sustainable materials, decisions such as this are outside our scope.
Waste	0	No action required.	Best practice is to leave ACMs in situ and monitor the condition of the materials, however should degradation of the materials indicate removal is necessary, this could cause a short term increase in waste produced. The nature of ACMs necessitates disposal in specialist landfill site.

SOCIAL	Scores	Action	Justification
Food	0	No action required.	0
Health	4	No action required.	Evidence suggests that employees are happier, have better morale and are more
Housing	0	No action required.	No Impact
Education	4	No action required.	Advocates for a level of training required for nominated employees across the partnership, does have an affect outside of this. The Policy will result in improved knowledge and awarness of asbestos hazards and risks.
Built Community	4	No action required.	By properly managing ACMs, council controlled buildings are safer spaces for all who use them
Cultural Community	0	No action required.	No effect on Cultural Community
Accessibility	0	No action required.	Not Applicable
Local Economy and Jobs	0	No action required.	Not Applicable
Safety	0	No action required.	Improved the safety of those working in and around Council controlled properties, reduced risk of asbestos damage and accidental release of ACMs.
Democratic Voice	0	No action required.	0
Equality	0	No action required.	No impacts on groups with protected characteristics. 0
