

25/01717/FUL - UPDATED RESPONSE Thames Water

Land West Of Hatherop Road, Fairford.

Thames Water has reverted back to its original comments in relation to sewage infrastructure capacity. This matter has been addressed in paragraph 10.80 of the Officer report. As stated in the report, it is recommended that the Thames Water condition is amended to refer to no more than 87 dwellings. There is an extant permission in place for 87 dwellings which is not subject to a foul sewage drainage condition and this is considered to represent a significant material consideration when assessing this application.
